JUNE MEETING

The June program was presented by one of our members Jack Eldman. Jack wanted a boat that could run full throttle all day long in 4 inches of water. This boat is used in salt water

for fishing and floundering.

So in 1978 he built his first Scooter boat. The Scooter has a sied type nosing not pointed, because a pointed nose causes a boat to raise up out of the water.

This boat is designed for shallow water nainly and does not do well in deep water. Running in that shallow of water, you punch a lot of holes in it, from oyster reefs, etc. So the boat is built with air tight compartments that boat is built with air tight compartments that make it unsinkable.

The Scooter is 6 foot wide by 17-4 foot long, this not only fits in a garage but can be flipped over inside a garage.

The boat is built upside down and then

flipped over.

The framework starts out with 1x10x16-0 foot pine. After the framework is built a skin of 1/8" marine plywood is applied to the bottom and 3/8" marine plywood is applied to the

Jack said his main tools are a 7" wide belt sander and power screwdriver. He uses brass ring shank nails, brass screws and plastic resin glue for fasteners.

From start to finish it takes about 3 months

to complete.

On his first boat he built a cone shaped tunnel, which was difficult to build and did not work as well as the rectangular tunnel that he built for his second boat.

Jack covers all surfaces with epoxy resins because it is waterproof, not caustic, does not smell and looks like varnish. The only problem he has found with the epoxy resin is that cracks appear at the wood joints--he believes hat because the epoxy adheres so well that when the wood shifts beause of the sun the epoxy cracks.

Jack estimates that his second boat costs

him about \$2,000 with \$1000 in epoxy--he also saved the hardware from his first boat. Thanks Jack for an interesting program.

CHARITY SHOW AND SALE

Well we have a date and location for this years charity sale. The date is October 23 and 24, that's Friday ans Saturday at the Greenspoint Mall.

Now we needs lots and lots of Items for the sale. We can sell almost anything from the ltty-bitty to the very large. So lets start making lots and lots of sawdust and projects.

TELEPHONE COMMITTEE

Guy Meaders is chairman again this year and asked for about 20 members to help him --if you would like to be on this committee-get in touch with Guy.

SAFETY -----Open forum

When cutting a bevel on a table saw it was recommended that you not complete the cut---this was after a member had table saw kick back. The table saw slung his beveled cut 70-0 through an open door.

Always use your push sticks and your head

before and during a cut.

PROBLEMS AND SOLUTIONS

Denis wondered if anybody had a Porter Cable 690 router that gets very hot while idling. It was suggested that he check the carbon brushes.

One of the members asked if anybody had any experience with the New Ryobi table saw. One of the members has one but would not recommend it.

A member was looking for a bandsaw mill, one suggestion was marine lumber off McCarty.

We also had member looking for a place to castings--some Brass or Bronze suggestions were th Art Foundation, Shipping and industrial repairs, there is a foundry doing the lost wax casting in an industrial park in Sugarland.

BUY AND SELL

Shop built 12" Thickness/Surfacing Sander, no motor, \$65.00 contact Jacob Schulzinger at 776-9063.

JUNE'S MONTHLY PROJECT

Any project made from 12 board feet of lumber.

Bill Smith made a Folding stool out of pine.

Jack Conry made a wall mounted slatted magazine rack from pine.

Bob Gallant made a bird house from plans out of Weekend Pojects magazine.

JULY'S MONTHLY PROJECT

This month's project is any item associated with the kitchen--such as step stool, spice rack, spoons, or any item from the kitchen.

SHOW AND TELL

Bill Hochmuth made an old fashion adjustable candle stand lamp--no candle just good old electric bulbs. Plans from Woodworkers Journal Mar/April.

Robert Sandlin made a Victorian gingerbread scroll saw plant hanger and two clocks.

Leonard Elkholm made an 18 wheeler truck cab, plans in Dec. 1986 Fine Woodworking.

HARD TO FIND WOODS?

We want to pick the members brains for hard to find woods--like long leaf pine, Cypress and Woods for musical instruments. If you have some of these sources please bring us the name, address, phone and their speciality.

Maybe you know of some local saw mills--of course local saw mills in Texas can be next door or 100 miles next door.

LETS ALL SHARE OUR SOURCES!

NEW SHOP ITEM

if you have ever tried to hook up a Dust Collection System to a Delta 14" Bandsaw, you know how inefficient and how poorly designed the factory connection is. Delta has an after market attachment for converting the 1 1/4" hose connection with a five inch hose. You remove the existing 1 1/4" plastic unit, drill one hole and attach a metal 5" hose connector. The unit sells for under \$25.00 dollars.

THE WOODWORKERS SAFETY TEN COMMANDMENTS

- 1. Use protective equiptment whenever necessary: eye protection, hearing protection, hard hats, respirator, etc.
- 2. Use proper guards on all power equiptment, plus proper operating postions and procedures.
- 3. Operate power equiptment only after reading or receiving proper instructions.
- 4. Inspect hand tools and keep them in good condition.
- 5. Store all materials in a stable and secure manner.
- 6. Eliminate dust and dirt in the area by vacuum, if possible, rather than blowing or sweeping.
- 7. Store flammable liquids in suitable containers or cabinets.
- 8. Store combustible waste material in covered metal containers and dispose of it daily.
- 9. Provide adequate ventilation, particulary in finishing and drying areas.
- 10. Know where first aid can be found and where fire extinguishers are.

JULY MEETING

WHEN: JULY 11TH, 1992 9:00 A. M.

WHERE: BAYLAND COMMUNITY CENTER ON BISSONNET AT HILLCROFT

PROGRAM: The program will be presented by Richard Grimes of Houston Pattern Works Richard Grimes is a pattern maker, a very precise woodworking profession.
